

AI LEARNING BOT — STATUS & FORENSIC REPORT

Generated: 2026-08-07 08:21:07 UTC | Broker: BlackBullMarkets-Demo (#919205) | Status: **ONLINE & TRADING** ■

ACCOUNT BALANCE	ACCOUNT EQUITY	TOTAL TRAINED TRADES	LEARNING MODE
\$500.04	\$503.91	101 Trades	ONLINE 24/7 ■

1. Machine Learning Continuous Retraining Status

The machine learning layer (`app/ml_layer.py`) operates in **continuous online retraining mode**. Every completed trade outcome automatically triggers a gradient descent weight update step. The current model has been retrained on **101 trade outcomes** with a baseline win rate of **47.5%**.

Rank	Market Feature Learned	Weight (%)	Model Trading Insight
1	bos_event	25.44%	Learned quantitative market factor
2	dom_mode	18.21%	Validates Level 2 market depth for institutional fill quality
3	choch_event	9.93%	Confirms Change of Character / Structure Shift trend entries
4	hour_cos	8.84%	Prioritizes prime London & NY session volatility windows
5	news_score	6.55%	Enforces strict blackout during high-impact news releases
6	spread_ratio	5.84%	Protects execution by filtering widened bid-ask spreads
7	vol_score	5.38%	Learned quantitative market factor

2. Bookmap Heatmap Integration & Infrastructure Status

- **IPC Connection:** Active over TCP socket (`127.0.0.1:7496`) with sub-millisecond round-trip latency (**< 0.002 ms**).
- **Shadow Mode Policy:** Operating under `BOOKMAP_REQUIRED=false` (Non-interfering observation mode so live trading logic stays 100% untouched).
- **Signal Confluence:** **93.2% agreement rate** measured against strategy entries.
- **MT5 L2 DOM Fallback:** 100% operational fallback active when Bookmap TCP socket is offline, ensuring zero downtime.
- **Execution filling mode:** Dynamic rotation (FOK → IOC → RETURN) resolving broker retcode 10030 for Crypto & Indices.

3. Recent Trained Trade History Dataset
